In response to applicant's filing dated March 03, 2002. the following action is

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: none of the cited prior art shows or teaches an optical pickup having a first and second light beam sources reading different disk densities and an objective lens comprising: a refractive lens divided into a common area Rc which a low numerical aperture for reading a low density disk is passed. The objective lens is further divided into a high numerical aperture area Rh for passing a light beam reading a high density disk. The objective lens having a diffractive structure with concentric rings 11 and designed (d) to maximize the diffractive efficiency of a second or higher diffractive light at a wavelength corresponding to high recording disk as shown in the design of the objective lens steps in figs 3a, 3b, 6a and 6b

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6667943.

Any inquiry concerning this communication should be directed to NABIL Z HINDI

at telephone number (703) 308-1555.
